**Subject:** Front Sight Firearms Training Institute /Old Spanish Trail Highway

Hello Mike-

The California Energy Commission is reviewing the Hidden Hills Solar Electric Generating System Project <http://www.energy.ca.gov/sitingcases/hiddenhills/> located in Inyo County, California. Although the project is located in California a significant portion of the traffic would be utilizing roadways in Nevada, specifically, the Old Spanish Trail Highway that your students also utilize.

# CALIFORNIA ENERGY COMMISSION

Thank you for time to discuss the Front Sight Firearms Training Institute yesterday. I just want to confirm the operational information in order that we may incorporate the information into the Final Staff Assessment. Specifically:

- The Front Sight Firearms Training Institute trains approximately 30,000 students a year in a 10 month year- the Facility is closed July and August.
- The Front Sight Firearms Training Institute is open seven days a week - Classes offered are a 2 day or 4 day class – with hours starting at 6:30am or 8:00am and ending at 5pm or 6pm.
- The distance from SR 160 to Front Sight's private road along Old Spanish Trail Highway is approximately 3.5 miles; Front Sight's private road is approximately four miles.
- Approximately 98% of the students use SR 160 and 2% use SR 127; not every car is a single car occupant as students also carpool/attend with friends or family.
- Food service is provided on site which minimizes vehicle trips off-site during the day.
- The road was constructed in 2000 and to date has not been impassable due to rainstorms.

Did I capture the correct information? I very much appreciate your insight-

Candace M. Hill
