Subject: CEC record - Docket #11 - AFC - 03 Quail Brush Power Generation Siting Case.

Good morning,

My husband and I live in Santee and we walk in Mission Trails park every morning. As we walk into the campground area we can look up and see the proposed location for the Quail Bush Power Generation plant. It breaks our hearts to imagine what the plant will do to the environment here in Santee, and especially at Mission Trails. The park is such a treasure to San Diegans and it's irreplaceable. It seems so unfair that a power plant could be placed in the Santee area and be out of the control of Santee itself. This will impact property values of the folks of Santee.

Please don't let this happen. I imagine there are many large open areas away from children, schools, families and our treasured park where a plant could be located. Please don't just hit the easy button! Once this decision is made it can never be taken back.

Thanks for listening.
