**Subject:** Project #270282, Plan Area: East Elliott ? Quail Brush Power Plant CPA Initiation (CEC record - Docket #11 - AFC - 03)

The City of San Diego Planning Commission has their own interests in mind when considering the approval of a power plant on their eastern border, immediately next to neighborhoods and schools in the City of Santee. On the vast majority of days, pollution from the Quail Bush Power Plant will move towards the City of Santee and away from San Diego.

The City of San Diego is being the bad neighbor by piling up their trash against their next door neighbor's fence. But in this analogy, people's health is not effected, whereas the proposed power plant will have detrimental effects on people and the environment. If they truly need this power plant to be built, why are they not considering open space sites on the central or west side of the City of San Diego?

Please do not allow a power plant to be built in the midst of a growing urban area. There are many other options and the price to people's health is a price to great to pay.

Thank you,

Jeffrey Pruss
