Subject: CEC record-Docket #11-AFC-03 Quail Brush Power Generation Siting Case

Dear Mr. Solorio,

I join in the petition to the California Energy Commission, the San Diego Planning Commission, and all agencies to categorically reject any proposals by any entity to construct a power plant alongside Mission Trails Regional Park (MTRP). The Quail Brush Power Plant will negatively impact anyone who lives, works, or attends school nearby, and anyone who frequents the park. As a frequent park visitor, I am very concerned about the visual and auditory impacts the power plant and stacks will have on the enjoyment of MTRP. The tranquility of our open-space park, a local and national treasure, with historical, geographic, and wildlife preservation value, will be adversely affected.

Our health and the lives of our children and elderly and the animal species in MTRP depend on your decision. To construct a power plant anywhere near Mission Trails, which has long been designated Open Space, and not an industrial area, is not in the best interests of the citizens of San Diego county who desire to preserve our remaining open space. Please halt the present siting of the Quail Brush Generation Project.

Sincerely,

Jim McNeil
