Dear Mr. Solorio,
please see my attached letter regarding the Quail Brush Generation Project.

Thank you for your time.

Sincerely,

Tatiana Braden

Eric K. Solorio, *Project Manager*
California Energy Commission
Siting, Transmission and Environmental Protection Division
1516 Ninth Street, MS-15
Sacramento, CA 95814

Dear Mr. Solorio,

As a resident of Santee and as a mother, I strongly oppose *Quail Brush Power Plant (11-AFC-03)*. Its proposed location threatens the quality of life, property value, and health of citizens that live in this area. It also endangers the natural habitat of many animals and plants.

Because we live in a very close proximity to the future power plant, we will be constantly exposed to the high levels of noise this plant will generate. Every time we will visit Mission Trails Park or just play in our own backyard, we will be exposed to air pollution. I fear my child might develop asthma from breathing the toxins and I am scared one day we will be plagued by cancer caused by this power plant. Selling our home will be out of the question since the property values will definitely drop.

Every day I teach my child how to live greener, save energy, and be kind to the environment that we live in. Please, help me show her that there are others that care about our environment and health. Please, help me protect her health. Stop the Quail Brush Power Plant.

Sincerely,

Tatiana Braden
