**Subject:** CEC record-Docket #11-AFC-03 Quail Brush Power Generation Siting Case

Greetings,

I am the fourth generation of a family home that has been located in Santee since 1940. Various research has shown that living within five miles of a dump increases your chances of acquiring cancer and various other diseases because of the toxins that are slowly broken down and released in the air. My mother died of cancer when I was 19 and I believe the increasing size of the local landfill played a part in that. I would not like my children to face the same fate as I did. Please stop using the Sycamore landfill, especially in an area so close to residential properties. As a society we need to do all that we can to decrease waste.

Now we want to put in an power plant so neighboring residents can have a smörgåsbord of pollution in the air. Oh yeah, and let's not forget the 125 that now hovers over Santee. WE DO NOT WANT THIS.

Please choose "No Project Alternative."

Sincerely,

Elizabeth Vaughan
