Subject: CEC record-Docket #11-AFC-03 Quail Brush Power Generation Siting Case

Re: CEC record (Docket #11) (AFC) (03 Quail Brush Power Generation Siting Case)

There must be large sums of money filling the pockets and campaign coffers of officials for this patently idiotic idea of building a natural gas power plant within a wildlife preservation area, hazardous fire zone, very near a high school, and that will have negative health effects on the entire population of 56,000 people in Santee, CA.

Then I come to find out that the slimy tentacles of Goldman Sachs, the purveyors of economic piracy, are lurking under the depths of this deal. Now I'm certain there will be several pay-offs to promote this monstrosity along with plenty of "expert" testimony and biased impact studies that prove opposing concerns are unfounded. Then, there is the unmitigated hypocrisy of allowing this perpetual spewer of toxic waste and noise pollution into people's backyards while putting the screws to much smaller and temporary polluters via restrictive regulations and fines. I guess if you have enough money to throw around you can get a free pass on environmental compliance. The nonsense of this proposed project is so obvious that only graft and revenue enhancement can explain it moving forward.
