Dear Mr. Solorio,

With a 33 percent state mandate and a population increasingly interested in “going green,” the use of wind and solar is more important than ever. Unfortunately, these resources don’t produce power 24/7. Sometimes the wind dies down and the sun goes behind a cloud.

That is why back-up generation like the Quail Brush project is needed. By providing power at times when renewable are offline, Quail Brush will keep the lights on and support the development of additional wind and solar facilities. As someone who strongly supports renewable energy, I would like to see Quail Brush become a reality.

Thank you.

Sincerely,

Eric Knowles | Lic. 00944210 | Senior Vice President
