To: Solorio, Eric@Energy

Please take into consideration my DEEP OPPOSITION to the idea of Saturday, May 05, 2012 2:55 PM

placing a power plant with 11 (100ft) smokestacks and the additional power lines in RESIDENTIAL area and in adjacent to a San Diego treasure - MISSION TRAILS PARK. As an Independent voter, I try to be open minded about various issues. Yes we need more power and energy independence. However, there are better alternatives. REZONING and DESTROYING PARKS AND COMMUNITIES with a power plant is NOT one of them. We develop comprehensive land planning, then have to battle to keep special interest from seeking variances. San Diego is financially under water thanks to special interest - employee unions that bribed former politicians. Please don't let them ruin our communities and parks!!

Your help is appreciated!
