

Quail Brush Project

Greetings,

As a 25 year resident and homeowner in the City of San Diego, I wholeheartedly **oppose the Quail Brush Generator Project.**

Is it too much to ask they consider sites already zoned industrial, not currently open space? Any complex at the sites will disrupt the watershed, be incredibly unsightly with eleven 100 foot smokestacks, spew tons of toxins near residential areas and a high school. We need energy, however this project does nothing to promote sustainable solutions.

My property fronts Mission Trails Regional Park - I moved here for the open space. Please listen to those opposed. This is not a solution to the energy issues.

Sincerely,

Judith L. Ravetti
