Subject: No Quail Brush Generating Site, Docket 11 AFC 03 (& No Sunrise Powerlink)

Dear Mr. Solorio:

Please oppose the siting of the Quail Brush Generating Power Plant near Mission Trails Park in San Diego County.

It is unnecessary, grossly polluting, noisy, harmful to global warming weather, will cause respiratory and nervous illness and wildfires as well as contribute to storms elsewhere, deplete our water and food supply and continue us down the path to our species extinction.

I believe this power plant is a slap in the face to the people of San Diego, to get a foot in the door that is closing on global warming fuel, is a negligence of SDGE's mission to do public good, and should be stopped immediately, finally and once and for all.

Also put a stop to SDGE's building the Tequial Sunrise Extension Cord Powerlink, which has been begun unlawfully, illegally and criminally in our county. This project as well will cause gross pollution across the sea, through Mexico, and raise the fire danger to our county while not benefitting San Diego County at all.

Instead of these 2 harmful projects, please force SDGE to install solar roofs on every building in San Diego, and not charge for harmful to health Un-Smart Meters, not install Un-Smart Meters, and to start fulfilling California law to go alternative energy 80% by 2050.

This is a matter of life and death for us in San Diego, please help us against this monster giant corporation that has become a death threat to the people. Thank you.

Valerie Sanfilippo
