

Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission's website and be available to the public.

Consider the Carlsbad cluster that occurred back in 2010,

There were several cases that involved children

developing cancer within miles of the power plant.

I am oppose to the Quail Brush Generation. Our

environment, our children and; our wild life

CAN'T afford the risk. Please find another

way that is not harmful to our environment.
