Subject: "CEC record-Docket #11-AFC-03 Quail Brush Power Generation Siting Case."

Its about time that local communities decide what is good or bad for their communities. After all when you live in a community you are directly affected. If you are a decisionmaker who lives in Washington DC or Sacramento how can you truly decide what is best for the public interest of that community. Local government has already made its decision and this should be a moot issue. Besides there are plenty of other places to put this power plant. Remember electricity travels at 186,000 miles/second.

Please stop this project.
