Subject: Quail bush power plant docket #11AFC03

Categories: Ready to Docket

CEC Commissioners,

This is absolutely the wrong place for a power plant. It is zoned open space, part of the city of San Diego's Multiple Habitat Planning area and next to Mission Trails Park-a well loved and highly used open space park popular with hikers, families and bikers. It would violate the city's zoning laws. It would be a horrible precedent to allow this degradation of land.
