**Subject:** CEC record-Docket #11-AFC-03 Quail Brush Project - Opposed

**Categories:** Ready to Docket

I'm opposed to the Quail Brush Project and request that the application to construct it be denied. The project is not needed. In situ solar projects would do a better, safer job of supplying electricity to all of us. There is much evidence to support available to you, so I won't go into the details. However, one type of evidence that has been given short shrift is that centralized distribution is subject to terrorist attack or cyberattack, problems that are becoming more possible every day' in situ solar power is a safer, smarter way to prevent these attacks. So, please, stop creation of another target for domestic and foreign enemies to hit by denying this project your approval.

Thank you.
