Palen Solar Energy Project

I oppose huge renewable energy facilities on public land. I don't like the idea of 750' tall towers that change our desert viewscape. I don't like the way these facilities cook birds. I don't like the rate increases that are sure to be in our future. I don't like the desert disturbance. Place solar panels on existing structures and make a real difference. It is nonsense to place these huge facilities on public land for a pittance of unreliable power.
