Public Comment regarding the proposed Huntington Beach Energy Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission's website and be available to the public.

My concern is that the new plant will be more polluting than the existing one because it will be running much more - potentially 24/7 - a rep from the AQMD told me it is being treated as such & that, even considering the faster start up time, it actually will be more polluting - This is of course not acceptable as the prevailing wind puts the pollutants over the neighborhood about 70% of the time -
