| RECD.            | <u>DEC 15 2009</u> |

Today I talked with Ken Weisel, Interim Director, City of Lodi Electric Utility Department.

Mr. Weisel confirmed that the Solar Demonstration Project at the White Slough Water Treatment Control Facility is expected to be operational within Fiscal Year 2011, approximately one year before the Lodi Energy Center is expected to be on-line.

The Solar Demonstration Project will occupy the land identified by Energy Commission staff as the location for a condition of certification (landscaping) for licensing the Lodi Energy Center. See attached map.

Consequently, staff is withdrawing the condition of certification. This information was communicated to Mr. Weisel.
