Application for Certification for the Lodi
Energy Center

DOCKET NO. 08-AFC-10

**LODI ENERGY CENTER
SEPTEMBER STATUS REPORT**

The Northern California Power Agency (NCPA) submits this September Status Report to update the Committee on the progress related to the processing of its Lodi Energy Center Application for Certification (AFC).

NCPA completed its public works bid process and selected the Siemens Energy, Inc. power island package. This required filing a Supplement to the LEC AFC documenting the changes proposed and providing Staff with updated information necessary to complete its Preliminary Staff Assessment (PSA). Staff has been working diligently to incorporate the changes and NCPA applauds the effort. We understand the PSA will be published shortly. NCPA also submitted corresponding changes to the San Joaquin Valley Air Pollution Control District (SJVAPCD) Preliminary Determination of Compliance (PDOC). SJVAPCD has reviewed the information and has determined that it will issue a draft Final Determination of Compliance (FDOC) incorporating the change in turbine package.

NCPA appreciates these efforts and the priority given to this public agency project and will continue to work cooperatively with Staff. It is of paramount concern to NCPA that the PSA be published as soon as possible in order to enable commercial operation in time for the summer peak of 2012.
