Mr. Christopher Meyer
Project Manager
California Energy Commission
1516 Ninth Street
Sacramento, CA 95814-5512

Subject: SES Solar One (08-AFC-13)
Response to Data Adequacy Requests - Water
URS Project No. 27658189.10000

Dear Mr. Meyer:

On behalf of SES Solar One, URS Corporation Americas (URS) is responding to Staff's request for additional information regarding the October 2008 pump test of a well in the vicinity of the Solar One site and to clarify the Applicant's comments concerning the date that data from a well test will be submitted to the CEC.

A pump test was attempted in October 2008 on an existing water well in the vicinity of the Solar 1 project. The existing well was not in sufficient condition to support analysis of the pump test. Therefore, there is nothing to report to the CEC at this time.

No additional test wells have been drilled in the Solar One Project vicinity, and such wells will require permitting by the BLM. Therefore, no additional information is available. Per CEC coordination, an assessment of existing information in the region was provided as a response to CEC Data Adequacy Request 51 which is all the information that is available at this time. Once data from a future well test is available, it will be submitted to the CEC in a future supplemental filing.

Sincerely,

Bill Magdych, Ph.D.
Project Manager
