PROJECT TITLE: Beacon Solar Energy Project

<input checked="" type="checkbox"/> Telephone	(559) 243-4014 xt 231	<input type="checkbox"/> Meeting Location:	
NAME:	Annette Tenneboe CDFG	DATE:	11-26-08
		TIME:	2:00p.m.
WITH:	Susan Sanders, Biologist, Aspen Environmental Group		
SUBJECT:	Streambed Alteration Agreement for Re-Routing Desert Wash		

I asked Annette for the status of their analysis of the proposed re-routing. Dale Stanton (engineer for S.J. River Restoration Project for CDFG) was willing to look at the hydrological analysis and engineering design of the re-routed wash. However, he is doing this as a courtesy to Annette and has not been officially assigned to this project.

Dale was concerned about the radii angles, and the calculations based on those data. He also had some of the same concerns as Casey on the outlet for the wash. Once Dale is done with his review, Annette may send his report up to Sacramento for review by their engineers. She thought it would be unlikely that anything would be done on this before the end of the year.

Annette would appreciate input from our end on evaluating assumptions of their hydraulic analysis and their engineering design. I told her I would check with my project manager to see if we could get some additional help on that.

FEMA issue is another concern (I copied her on the letter from Kern County regarding the Conditional Letter of Map Revision), and Annette also mentioned that the applicant will need to get a separate, long-term Maintenance Agreement from CDFG to deal with sediment disposal.

The applicant has contacted Annette, and she may meet with them sometime soon to discuss some of her concerns, although she would prefer to wait until Dale has finished his analysis. She will let me know if she arranges such a meeting.
