Re: Staff Workshop for The Beacon Solar Energy Project (08-AFC-2); to be held on January 11th, 2010

Hi Eric

I am e-mailing you today because; it is my greatest hope and desire that yourself and the rest of the commission would reach a compromise agreement with Beacon Solar. California City has presented a proposal to supply reclaimed treated water to the Beacon Solar site. Please give your utmost consideration to their proposal being submitted.

This entire project will do a lot to immensely bless this entire region of the Antelope Valley and help the State of California meet some of it goals for clean energy production.

Thank You in advance for the time required reading this letter.
If you have any questions you may e-mail me at the entry listed above.

God Bless You and the all the Commission Members.

Kim W. Collins
