RE: Marsh Landing Generating Station
Application for Certification No. 08-AFC-03

On behalf of Mirant Marsh Landing, LLC, an indirect wholly owned subsidiary of Mirant Corporation, and the applicant for the above-referenced Marsh Landing Generating Station (MLGS), we are pleased to submit the enclosed document:

- Supplemental Information in Response to CEC Data Adequacy Request

On May 30, 2008 Mirant Marsh Landing submitted an initial Application for Certification for the proposed MLGS. The California Energy Commission staff subsequently reviewed the Application in accordance with its Data Adequacy checklist and identified additional information requirements. Mirant Marsh Landing, working with its project team, has fulfilled each of the information requirements and hereby submits this Supplemental Information.

In addition, the Applicant has updated the AFC Project Description Chapter and Air Quality and Public Health Sections to be consistent with the Authority to Construct (ATC) application that was submitted to the Bay Area Air Quality Management District on June 25, 2008 and deemed complete on June 30, 2008. Updates included adding two small gas preheaters to the project and expanding the normal operating range of the FP10 gas turbines. The AERMOD modeling for construction was updated because a "bug" was discovered in the original code used for the AFC construction modeling. A few minor edits were also made to the Project Description Chapter and Socioeconomics Section.

Sixty print copies of replacement and additional pages are enclosed, for insertion into the initial Application. Additionally, we include 65 CDs containing the May 30 AFC supplemented with these replacement and additional pages. Five copies of the CD containing the updated Air Quality and Public Health modeling files are also enclosed.

Please include this document in the AFC record.
