Joe

To follow-up from our recent conversation regarding the modified Marsh Landing Generating Station (MLGS) as presented in the Sep '09 AFC Amendment:

- 1) The total construction costs for the MLGS include the linears.
- 2) There is no change in the school impacts, since there is no change in the building square footage.
- 3) Clarification on the economic output, which is based on IMPLAN Social Account Matrix (SAM) multipliers is provided below for construction and operations:

a) construction

Total direct construction cost = \$550MM
 Total cost within 5 county area (labor and materials) = \$114MM
 Indirect cost = \$43MM
 Induced cost = \$92MM
 total economic output = \$249MM

Approximate output multiplier for 5 county area = \$249MM/\$114MM = 2.18

b) operations

Total annual O&M direct cost = \$7.7MM
 Total cost within 5 county area (labor and materials) = \$2.9 MM
 Indirect cost = \$0.4MM
 Induced cost = \$2.1MM
 total economic output = \$5.4MM

Approximate output multiplier for 5 county area = \$5.4MM/\$2.9 MM = 1.86
