Re: Notice of Receipt of Complete Applications
Project Number: N-1083212

Dear Mr. Kehoe:

The San Joaquin Valley Air Pollution Control District (District) has received your Authority to Construct applications for the modification of an existing simple-cycle power plant to convert the plant into a combined-cycle power plant, to install an auxiliary boiler, and to install a diesel-fired emergency engine powering a fire pump, at 14950 West Schulte Road in Tracy, CA. Based on our preliminary review, the applications appear to be complete. This means that your applications contain sufficient information to proceed with our analysis. However, during processing of your applications, the District may request additional information to clarify, correct, or otherwise supplement, the information on file.

Per your request, the Authorities to Construct will be issued with a Certificate of Conformity (COC). Your project will therefore go for EPA Review per District Rule 2520 for a 45-day period at the conclusion of our analysis, prior to the issuance of the final Authority to Construct.

We will begin processing your applications as soon as possible. In general, complete applications are processed on a first-come first-served basis.

It is estimated that the project analysis process will take 116.5 hours, and you will be charged at the weighted hourly labor rate in accordance with District Rule 3010. This estimate includes the following major processing steps: Determining Completeness (16.5 hours), Engineering Evaluation (45 hours), BACT Analysis (25 hours), Health Risk Assessment (10 hours), CEQA Analysis (10 hours) and Permit Preparation (10 hours). The current weighted labor rate is \$90.00 per hour, but please note that this fee is revised annually to reflect actual costs and therefore may change. No payment is due at this time; an invoice will be sent to you upon completion of this project.
