Call To:	<u>Doug Wheeler, GWF</u>	Date:	<u>6/2/09</u>
Phone #:	<u>209-831-4434</u>	Time:	<u>12:00 PM</u>
Company:	<u>GWF Power</u>	Project #:	<u>PWA 1835.03 / CEC 2008-AFC-7</u>
			<u>GWF Tracy - Environmental</u>
		Project Name:	<u>Compliance</u>
Subject:	<u>GWF Tracy</u>	Completed by:	<u>Vince Geronimo, PE</u>

Conversation Summary:

Vince Geronimo spoke with Doug Wheeler, GWF to discuss the GWF Tracy raw water allocations from BBID. BACKGROUND - Water allocations from BBID are tied to the reduced CVP allocations. The CVP restricts water allocation during drought years and has different restrictions for Agricultural (Ag) and Municial & Industrial (M&I) users. The GWF Tracy Peaker Plant (TPP) was located on former Ag land and has an Ag right to CVP water. The TPP site is now partially being used for industrial purposes. With GWF Tracy more land will be converted to industrial use. Staff is interested in understanding which CVP restriction applies to GWF Tracy. Mr. Wheeler described the GWF site's CVP water rights were M&I allocations. Mr. Geronimo verbally confirmed this with Rick Gilmore, BBID General Manager on this same day. Mr. Gilmore agreed to provide a written response to address this concern prior to the June 23rd PSA Workshop.

Follow-up / Action Items:

No changes to the PSA are required. Follow-up with Rick Gilmore before the PSA Workshop. Mr. Geronimo will address this issue directly with the Applicant during the PSA Workshop.

Route To: Alan Solomon, CEC
