Docket Number: 11-AFC-03

Please vacate and deny the suspension of Quail Brush Generation Project.

Dear Commissioners:

We are opposed to an additional year suspension for the Quail Brush Generation Project 11-AFC-03 in the East Elliott Planning Area.

Please deny this suspension. Furthermore, I respectfully request that the application be vacated. I am a San Diego native, and a current private school Life Science teacher. My wife is an Adapted PE teacher with San Diego Unified. Our family enjoys all that San Diego offers; the coast, the mountains, the deserts and the inland canyons. Mission Trails not only is a wonderful asset to the community as an environmental preserve but for me personally a haven for the mountain bike and multi use trails. There is tremendous benefit for a community to have healthy citizens and for this citizen, riding the local canyons is extremely beneficial.

A fossil fuel power plant is completely inappropriate for the ecologically sensitive area adjacent to Mission Trails Regional Park and surrounding communities with nearby schools, hospitals, and homes. The project is inconsistent with the City of San Diego's LORS. It was denied by the City of San Diego Planning Commission, the San Diego City Council, and the City of Santee. There is massive bipartisan public opposition to Quail Brush.

The proposed project is also located within the East Elliott Multi Habitat Planning Area, part of San Diego's Multi Species Conservation Program (MSCP) open space area. The Mission Trails Regional Park Task Force opposes the siting of the power plant.

The taxpayers of San Diego County object to any further spending of California taxpayer dollars in pursuit of a project that violates so many key local land use provisions.

The cumulative air quality impact to low-lying Santee is not acceptable, no matter what mitigation the power plant offers. The high fire hazard of a gas plant here is too high a price to pay.

Please end the 11-AFC-03 process and focus on truly progressive projects-- such as energy storage and rooftop solar--in appropriate places, to generate energy.

Sincerely,

Dave and Terri Johnson
