Quail Brush Power Plant AFC (11-AFC-03) - Deny suspension

Dear Commissioners:

The Citizens of San Diego have spoken before and we donâ€™t intend to change our minds about the proposed gas-generated plant that was given the name “Quail Brush”. I, like everyone else who I have talked with, am opposed to your granting an additional year suspension for the Quail Brush Generation Project 11-AFC-03 in the East Elliott Planning Area.

Please deny this suspension. Furthermore, I respectfully request that the application be vacated.

The environmental record is clear on this project, and the costs to ratepayers are unreasonable given that our region could be putting those funds into solar PV systems over the many square miles of parking lots, with much better economic benefit to us all “ except for the corporation that wants to build the so-called Quail Brush.

Please end the 11-AFC-03 process and focus on truly progressive projects-- such as energy storage and rooftop solar--in appropriate places, to generate energy. Parking lots all over San Diego would be great used as solar PV sites. They would also shade cars and cut down on local heat gain. WIN “ WIN “ WIN. Unlike Quail Brush, lose “ lose “ lose.

Please put me on your notification list for future news about this project from your office.

Sincerely,

Katherine S. Stewart, 2750 Wheatstone Street # 102 San Diego CA 92111-5451
