Reject suspension of Quail Brush

As an Intervenor on the Quail Brush project I am very aware of the significant shortcomings of the project. There are large issues with the siting both from an environmental and community impact, but also from a general connection to the grid. This project should have been canceled from the start, suspending the project puts an unnecessary burden on the taxpayers and community who do not get paid to monitor the proceedings. Nothing positive has changed about the project, it was a horrible idea at the time and continues to be a bad plan.

Roof top solar and stored energy are much better alternatives and more distributed. Please do the right thing and cancel this project.

Kevin Brewster
