Re: Quail Brush Power Plant Proceedings

I strongly object to reconsideration of building this gas powered plant. Not only is it detrimental to our local environment, especially Mission Trails Regional Park, but the environmental damage from the production of and combustion of natural gas is extensive as documented throughout the U.S. Alternative fuel sources should be utilized before considering another polluting, fossil fuel facility. This is extremely short sighted.

Please protect Mission Trails, endangered wildlife and people by terminating the Quail Brush application, not extending it.
