Docket Number: 11-AFC-03

Just say No to the Extention of this Application

Dear Commissioners:

How long must this go on? The extension of this application is preposterous. How much more of our tax monies will be wasted to continue this folly? The city of San Diego does not want it, the city of Santee does not want it, and the California Public Utilities Commission says it is not needed. Why should this be allowed to happen? I am opposed to an additional year suspension for the Quail Brush Generation Project 11-AFC-03 in the East Elliott Planning Area.

The evidence on the record is overwhelming - the Quail Brush application should be terminated, not extended. Please protect public health and safety, endangered wildlife and Mission Trails Regional Park by rejecting the applicant's 2nd request for suspension. Please deny this suspension. Furthermore, I respectfully request that the application be vacated.

A fossil fuel power plant is completely inappropriate for the ecologically sensitive area adjacent to Mission Trails Regional Park and surrounding communities with nearby schools, hospitals, and homes. The project is inconsistent with the City of San Diego's LORS. There is massive bipartisan public opposition to Quail Brush.

The proposed project is also located within the East Elliott Multi Habitat Planning Area, part of San Diego's Multi Species Conservation Program (MSCP) open space area. The Mission Trails Regional Park Task Force opposes the siting of the power plant.

The taxpayers of San Diego County object to any further spending of California taxpayer dollars in pursuit of a project that violates so many key local land use provisions.

The cumulative air quality impact to low-lying Santee is not acceptable, no matter what mitigation the power plant offers. The high fire hazard of a gas plant here is too high a price to pay.

Please end the 11-AFC-03 process and focus on truly progressive projects such as energy storage and rooftop solar in appropriate places, to generate energy.

Sincerely,
John Frice
