**SUBJECT: WALNUT CREEK ENERGY PARK PROJECT (05-AFC-2C)
Approval Of Project Changes – Expansion Of Project Description To
Include An Off-Site Industrial Wastewater Discharge Connection**

Dear Ms. MacLeod:

In accordance with the provisions of Title 20, California Code of Regulations, Section 1769(a), California Energy Commission staff reviewed your petition dated April 24, 2012, requesting a change to the project description to include an off-site industrial wastewater discharge connection. The proposed connection would be to the existing Los Angeles County Sanitation District (LACSD) 42-inch diameter trunk sewer line, located approximately three feet to the west of the original licensed project boundary, on an adjacent parcel owned by the City of Industry.

Staff determined that the petition met the criteria of Section 1769(a) (2), and mailed a "Notice of Determination" to the Energy Commission's post-certification project mailing list on June 15, 2012.

Energy Commission staff did not receive any public comments regarding this requested project change during the 14-day public review period as specified in Section 1769(a)(2). Therefore, your requested modification to the Walnut Creek Energy Park project is approved.

If you have any questions, please call me at (916) 654-3940, or contact me via email at Camille.Remy-Obad@energy.ca.gov.

Sincerely,

Camille Remy-Obad
Compliance Project Manager
