Subject: Mariposa Energy Project (09-AFC-03)
USACE Wetland Delineation Amendment for the Mariposa Energy Project – Field Verification Including the Alternative Water Supply Pipeline Route

Dear Mr. Hoffman:

Attached please find 1 hard copy of the USACE Wetland Delineation Amendment for the Mariposa Energy Project – Field Verification Including the Alternative Water Supply Pipeline Route. This Technical Memorandum was prepared for the United States Army Corps of Engineers as a follow up to the wetlands field verification held on November 19, 2009.

If you have any questions about this matter, please contact me at (916) 286-0348.

Sincerely,

CH2M HILL

Doug Urry
AFC Project Manager

Wetland Delineation Amendment for the for the Mariposa Energy Project – Field Verification Including the Alternative Water Supply Pipeline Route (File # SPK-2009-01261)

PREPARED FOR:        Mark Fugler
                      U.S. Army Corps of Engineers
                      Regulatory Branch

PREPARED BY:         Russ Huddleston

COPIES:              Doug Urry/CH2M HILL
                      Todd Elwood/CH2M HILL
                      Bo Buchynsky/Mariposa Energy
                      Craig Hoffman/California Energy Commission

DATE:                November 30, 2009

A wetland delineation report for the Mariposa Energy Project (MEP) in unincorporated Alameda County, California was submitted to the U.S. Army Corps of Engineers for review and on September 24, 2009. Since that time an alternative water supply pipeline route extending from the project site to the Mountain House Waste Water Treatment Plant (WWTP) has been added to the study area. The alternate water line would extend to the northeast across the project parcel and continue approximately 2.5 miles east along Kelso Road to the Byron Highway. The alignment would then continue to the southeast along the highway for 2.3 miles to Wicklund Road where it would then continue directly north to the WWTP facility. The survey area for the water line alignment included approximately 75 acres consisting of a 100-foot corridor along the proposed alignment. For those sections where the water supply pipeline would be located within or immediately adjacent to an existing roadway, in which case only the areas adjacent to the excavation were included in the analysis as it was assumed areas on the opposite side of the roadway would not be affected. The total survey area for the MEP and associated linear features is provided in Table 1.

Seven water features and one seasonal wetland area were identified within the survey area for the alternate water supply pipeline. These features included:

- A small section of the Byron-Bethany Irrigation District’s Canal 70 along Kelso Road (Figure 2-2, Map 2)
- A small drainage ditch along the south side of Kelso Road, just east of Canal 70
- A seasonal wetland associated with an agricultural drainage ditch system on the south side of Kelso Road, east of Mountain House Road (Figure 2-2, Map 4)
- A drainage ditch on the south side of Kelso Road west of Patterson Park Road (Figure 2-2, Map 5)
• A routinely maintained agricultural ditch on the south side of Kelso Road, east of Patterson Park Road (Figure 2-2, Map 6)
• Mountain House Creek along west Byron Road (Figure 2-2, Map 8)
• Finally a small portion of a diversion canal W1D from the Old River is included in the study near the terminus of the alignment at the Mountain House WWTP (Figure 2-2, Map 11)

A field verification of the original MEP wetland delineation study area and the additional alternate water supply pipeline route was conducted on November 19, 2009. Table 3 provides a list of all wetlands and waters included in the 147.6-acre study area as verified during the November 19, 2009 field visit. Figures 2-1 and 2-2 show the locations of all wetland and water features identified in the study area as revised per the November 19, 2009 field verification.

DECLARATION OF SERVICE

I, Mary Finn, declare that on December 3, 2009, I served and filed copies of the attached 09-AFC-3 MEP TM Wetland Delineation Amendment dated November 30, 2009. The original document, filed with the Docket Unit, is accompanied by a copy of the most recent Proof of Service list, located on the web page for this project at: [http://www.energy.ca.gov/sitingcases/mariposa/index.html]. The document has been sent to both the other parties in this proceeding (as shown on the Proof of Service list) and to the Commission’s Docket Unit, in the following manner:

(Check all that Apply)

For service to all other parties:

__x__ sent electronically to all email addresses on the Proof of Service list;

__x__ by personal delivery or by depositing in the United States mail at Sacramento, California, with first-class postage thereon fully prepaid and addressed as provided on the Proof of Service list above to those addresses NOT marked “email preferred.”

AND

For filing with the Energy Commission:

__x__ sending an original paper copy and one electronic copy, mailed and emailed respectively, to the address below (preferred method);

OR

_____depositing in the mail an original and 12 paper copies, as follows:

CALIFORNIA ENERGY COMMISSION
Attn: Docket No. 09-AFC-3
1516 Ninth Street, MS-4
Sacramento, CA 95814-5512
docket@energy.state.ca.us

I declare under penalty of perjury that the foregoing is true and correct.

Mary Finn
