Dear Librarian:

DOCUMENT HANDLING FOR THE MARIPOSA ENERGY PROJECT (09-AFC-3) and POSTING OF PUBLIC NOTICE

The enclosed Supplemental Staff Assessment (SSA) contains the California Energy Commission staff’s engineering, public health and safety and environmental evaluation of the proposed Mariposa Energy Project. Please make this SSA available for those who may wish to be informed about the project. We request that you not allow the SSA or any of its contents to be removed from the library. To increase accessibility of the document, we ask, if possible, that you cross reference it as a general reference work under the title and author categories, as well as under such subjects as “Energy Commission,” “electricity energy/generation,” “power plant siting,” or any other relevant subject. Please retain the enclosed letter to the public behind the front cover of the SSA.

The Energy Commission’s siting process is open to the public and incorporates the input of the public as well as local, state and federal agencies. To facilitate public participation in our review process, the Commission distributes copies of staff documents such as the SSA to public libraries in communities near the proposed project, and in major cities throughout the state. As such, please retain a copy of the enclosed Notice of Availability behind the front cover of the SSA and also post a copy of the Public Notice in a place conspicuous and accessible to those members of the general public who visit the library.

Thank you for your cooperation. If you have any questions, please contact Craig Hoffman, Siting Project Manager, at (916) 654-4781 or at the address on this letterhead or by email to choffman@energy.state.ca.us.

Sincerely,

Original Signed by:
ROGER JOHNSON, Siting Office Manager
Siting, Transmission and Environmental Protection Division

NOTICE OF AVAILABILITY
SUPPLEMENTAL STAFF ASSESSMENT FOR THE PROPOSED
MARIPOSA ENERGY PROJECT
(09-AFC-3)

This notice is to inform you of the availability of the Supplemental Staff Assessment (SSA) for
the Mariposa Energy Project Application for Certification (09-AFC-3). The SSA was published
on December 16, 2010. The SSA contains the California Energy Commission staff’s
engineering and environmental evaluation of the proposed Mariposa Energy Project.

Energy Commission Staff Documents and Hearings

Energy Commission staff published a Staff Assessment (SA) for the MEP project on
November 8, 2010. This document included staff’s analysis, conclusions, and
recommendations for the project. Staff publically noticed the SA for a 30-day comment
period that lasted from Tuesday November 9, 2010 to Thursday, December 9, 2010.

During this comment period, a public workshop was held on Monday, November 29, 2010
at the Byron Bethany Irrigation District office to discuss staff’s findings, proposed
mitigation, and proposed compliance-monitoring requirements.

The Supplemental Staff Assessment (SSA) has been prepared based upon discussions at
the SA workshops and written comments provided by the applicant, agencies and public.
This SSA is a limited document representing revisions and additions to various technical
sections that were commented upon. This document does not include each technical
section. For a complete project description and all the technical sections please see the
original SA document with the complete engineering, environmental, public health and
safety analysis of the MEP project. The SSA only includes sections that were revised or
had public comments.

The MEP SSA contains the Energy Commission staff’s final environmental and
engineering evaluation of the project in the following technical sections: Air Quality/Green
House Gases, Alternatives, Biological Resources, Hazardous Materials, Land Use, Noise
and Vibration, Project Description, Public Health, Socioeconomics, Soil and Water
Resources, Traffic and Transportation, Transmission Line Safety and Nuisance,
Transmission System Engineering, Visual Resources and Worker Safety and Fire
Protection and will serve as staff’s testimony during evidentiary hearings.

Staff’s testimony that will be provided at the Energy Commission’s Evidentiary Hearings on
the MEP project will encompass the technical sections not modified in the SA and
revisions to sections included in the SSA.
Summary of the California Energy Commission Staff's Conclusions

Based upon the information provided to date and the analysis completed to date for each technical section, staff has concluded that with implementation of staff's recommended mitigation measures described in the conditions of certification, all potential environmental impacts will be mitigated to a less than significant level. The project analysis complies with the requirements of the California Environmental Quality Act (CEQA). For a detailed review of potentially significant impacts and the related mitigation measures, please refer to the analysis in the SA and SSA.

The Staff Assessment and Supplemental Staff Assessment will serve as staff's formal written testimony in evidentiary hearings to be held by the Energy Commission Committee assigned to hear this case. The Committee will hold evidentiary hearings and will consider the testimonies presented by staff, applicant, interveners and comments from government agencies and the public prior to preparing the Presiding Member's Proposed Decision (PMPD), which will also have a 30-day comment period. The revised PMPD will then be considered by the full Energy Commission which will issue the final decision.

Summary of the Proposed Mariposa Energy Project

Project Location

The proposed project site is in northeastern Alameda County, in an unincorporated area designated for Large Parcel Agriculture by the East County Area Plan. The site is located approximately 7 miles northwest of Tracy, 7 miles east of Livermore, 6 miles south of Byron, and approximately 2.5 miles west of the community of Mountain House in San Joaquin County.

The facility would be located southeast of the intersection of Bruns Road and Kelso Road on a 10-acre portion of a 158-acre parcel (known as the Lee Property) immediately south of the Pacific Gas and Electric Company (PG&E) Bethany Compressor Station and 230-kilovolt (kV) PG&E Kelso Substation. The proposed power plant site is located in the southern portion of the Lee Property. The existing, unrelated 6.5 MW Byron Power Cogeneration Plant occupies 2 acres of the 158-acre parcel northeast of the MEP site. The remainder of the parcel is non-irrigated grazing land.

Project Description

The MEP would be a natural gas-fired, simple cycle peaking facility with a generating capacity of 200-megawatts (MW). The project proposes to operate on average, 600 hours per year, but if licensed can run up to 4,000 hours per year. Primary equipment for the generating facility would include four General Electric (GE) LM6000 PC-Sprint natural gas-fired combustion turbine generators (CTG) and associated equipment. Power would be transmitted to the grid at 230-kV through a new 0.7-mile transmission line that would connect to the existing Kelso Substation. A new 580-foot natural gas pipeline would connect the project site to PG&E’s Line 2, which is an existing high-pressure natural gas pipeline located northeast of the project site. Service and process water would be fresh
irrigation water provided from a new connection to the Byron Bethany Irrigation District (BBID) via a new pump station and 1.8-mile pipeline. The MEP is proposing to utilize on average 35 acre feet of water per year. In the event of continuous and maximum permitted operation, the MEP would utilize 187 acre feet of water for 4,000 hours of operation. The applicant has volunteered to fund an annual water conservation program designed to conserve a volume of raw water equal to the volume of water consumed by the Mariposa Energy Project annually. All domestic wastewater would be routed to an onsite septic system and either discharged to an onsite leach field or removed via truck for offsite disposal. Stormwater runoff would be detained onsite in an extended detention basin and released according to regulatory standards for stormwater quality control. Air emissions control systems would include a selective catalytic reduction (SCR) system for nitrogen oxides (NOx) control using 19 percent aqueous ammonia and an oxidation catalyst for carbon monoxide (CO) control.

Temporary construction facilities would include a 9.2-acre worker parking and laydown area immediately east of the project site, a 1-acre water supply pipeline parking and laydown area located at the BBID headquarters facility, to serve water pipeline construction needs, and a 0.6-acre laydown area along the transmission line route.

Construction of the generating facility, from site preparation and grading to commercial operation, is expected to take place from mid 2011 to July 2012.

The applicant has a power purchase agreement with PG&E.

**Energy Commission Licensing Authority**

The Energy Commission is responsible for reviewing and ultimately approving or denying all applications for construction and operation of thermal electric power plants, 50 MW and greater proposed for construction in California. The Energy Commission’s facility certification process carefully examines public health and safety, environmental impacts and engineering aspects of proposed power plants and all related facilities such as electric transmission lines and natural gas and water pipelines. The Energy Commission is the lead agency under the California Environmental Quality Act (CEQA), and produces several environmental and decision documents rather than an Environmental Impact Report.

**Public Resources, Contact Information and Additional Sources for Information**

If you desire information on how to participate in the Energy Commission’s review of the proposed project, please contact Jennifer Jennings, the Energy Commission’s Public Adviser, at (916) 654-4489 or toll free in California at (800) 822-6228, or by email at: publicadviser@energy.state.ca.us.

To request special accommodations for those persons with disabilities, please contact Lourdes Quiroz, at lquiroz@energy.state.ca.us or by telephone (916) 654-5146. For those persons with limited English knowledge, request interpreter services by contacting the Project Manager, Craig Hoffman, at (916) 654-4781.
The status of the project, an electronic copy of the AFC, SA, SSA, copies of notices, and other relevant documents are also available on the Energy Commission’s web site at: http://www.energy.ca.gov/sitingcases/mariposa.

News media inquiries should be directed to Assistant Director, Susanne Garfield, at (916) 654-4989, or by email at: mediaoffice@energy.state.ca.us.

The SSA will be available for review at the following local libraries:

- Mountain House Branch Library
  579 Wicklund Crossing
  Mountain House, CA 95391
- Tracy Public Library
  20 E Eaton Ave
  Tracy, CA 95376

- Livermore Public Library
  1188 S. Livermore Avenue
  Livermore, CA 94550
- San Joaquin County Library
  605 North El Dorado Street
  Stockton, CA 95202

- Brentwood Library
  751 3rd St.
  Brentwood, CA 94513
- Fremont Main Library
  2400 Stevenson Blvd.
  Fremont, CA 94538

Copies are also available at the Energy Commission’s Library in Sacramento, the California State Library in Sacramento, and at public libraries in Eureka, San Francisco, Los Angeles, Fresno, and San Diego. In addition, this information has been shared with those public agencies that would normally have jurisdiction but for the Energy Commission’s exclusive authority to certify sites and related facilities.

If you would like a paper copy or CD of the SSA, please contact Hilarie Anderson, Siting Project Assistant, at (916) 651-0479, or by e-mail at handerson@energy.state.ca.us.

Sincerely,

Date: ____________________________

ROGER JOHNSON, Siting Office Manager
Siting, Transmission and Environmental Protection Division

Note: Please retain a copy of this Public Notice behind the front cover of the Supplemental Staff Assessment (SSA) and post a copy of the Public Notice in a place conspicuous and accessible to those members of the general public who visit the library. Thank You.
APPLICATION FOR CERTIFICATION
FOR THE MARIPOSA ENERGY PROJECT
(MEP)

Docket No. 09-AFC-3
PROOF OF SERVICE
(Revised 10/20/2010)

DECLARATION OF SERVICE

I, Hilarie Anderson, declare that on December 17, 2010, I served and filed copies of the attached Library Letter, Agency Letter and Notice of Availability. The original document, filed with the Docket Unit, is accompanied by a copy of the most recent Proof of Service list, located on the web page for this project at: [http://www.energy.ca.gov/sitingcases/mariposa/index.html].

The document has been sent to both the other parties in this proceeding (as shown on the Proof of Service list) and to the Commission’s Docket Unit, in the following manner:

(Check all that Apply)

FOR SERVICE TO ALL OTHER PARTIES:

X sent electronically to all email addresses on the Proof of Service list;

by personal delivery;

X by delivering on this date, for mailing with the United States Postal Service with first-class postage thereon fully prepaid, to the name and address of the person served, for mailing that same day in the ordinary course of business; that the envelope was sealed and placed for collection and mailing on that date to those addresses NOT marked “email preferred.”

AND

FOR FILING WITH THE ENERGY COMMISSION:

X sending an original paper copy and one electronic copy, mailed and emailed respectively, to the address below (preferred method);

OR

depositing in the mail an original and 12 paper copies, as follows:

CALIFORNIA ENERGY COMMISSION
Attn: Docket No. 09-AFC-3
1516 Ninth Street, MS-4
Sacramento, CA 95814-5512
docket@energy.state.ca.us

I declare under penalty of perjury that the foregoing is true and correct, that I am employed in the county where this mailing occurred, and that I am over the age of 18 years and not a party to the proceeding.

Original Signed Hilarie Anderson
