Attachment 1b - City of Anaheim Major Water Facilities Data Sheet

Attachment 2 - List of Property Owners within 1,000 Feet of the Proposed Project

Introduction

1.1 Background

On March 17, 2010, the California Energy Commission (CEC) approved and licensed Southern California Public Power Authority's (SCPPA) Canyon Power Plant (CPP). The CPP project is a nominal 200-megawatt simple-cycle power plant located in the City of Anaheim (COA). The project site is a 10-acre parcel is located about 3.25 miles northeast of downtown Anaheim at 3071 East Miraloma Avenue. The primary source of process water for the project is reclaimed water supplied from the Orange County Groundwater Replenishment System (GWRS) via a new 2,185-foot-long, 14-inch pipeline utilizing a new offsite booster pump station. Construction water is trucked from the COA owned Well 28, located approximately 1 mile from the project site. There are four new underground 69 kV circuits leaving the site. Two underground circuits exit the project's southern property line, crossing East Miraloma Avenue (approximately 100 feet) to interconnect to the existing 69 kV overhead Vermont-Yorba lines via two new steel transition poles. The second two 69 kV underground circuits exit the site eastward for approximately 4,000 feet in East Miraloma Avenue, turning south on Miller, then proceeding approximately 3,000 feet to connect to the Dowling-Yorba 69 kV line at East La Palma Avenue. Natural gas for the project is supplied from a new Southern California Gas Company 12-inch, 3,240-foot-long natural gas pipeline. The gas pipeline exits the site from the northeast corner, then proceeds north 2,660 feet in Kraemer Boulevard to East Orangethorpe Avenue to connect into SoCal Gas Company's line L-1218 in East Orangethorpe Avenue. Construction of the project began on April 5, 2010 and commercial operation is expected to commence in November 2011.

1.2 Description of Proposed Amendment

The purpose of this filing is to request the CEC's approval to amend the CPP project description to allow modification of the construction water source. More detailed information on these proposed changes is provided in Section 2.

1.3 Necessity of Proposed Change

Sections 1769 (a)(1)(A), (B), and (C) of the CEC Siting Regulations require a discussion of the necessity for the proposed revision to the CPP project and whether the revision is based on information known by the petitioner during the certification proceeding. The proposed change is necessary to allow uninterrupted construction of the CPP project.

1.4 Summary of Environmental Impacts

Section 1769 (a)(1)(E) of the CEC Siting Regulations requires that an analysis be conducted to address impacts the proposed revision may have on the environment and proposed measures to mitigate significant adverse impacts. Section 1769 (a)(1)(F) requires a discussion of the impacts of proposed revision on the facility's ability to comply with applicable laws,

ordinances, regulations, and standards (LORS). Section 3 discusses the potential impacts of the proposed change on the environment, as well as the proposed revisions' consistency with LORS.

1.5 Consistency of the Change with the License

Section 1769 (a)(1)(D),(F) of the CEC Siting Regulations requires a discussion of the consistency of each proposed project revision with the assumptions, rationale, findings, or other bases of the Final Decision and whether the revision is based on new information that changes or undermines the bases of the final decision. Also required is an explanation of why the change should be permitted. The proposed revision does not undermine the assumptions, rationale, findings, or other basis of the Final Decision for the project. In addition, the project amendment as proposed is expected to comply with all applicable LORS.

SECTION 2

Description of Project Change

Consistent with the CEC Siting Regulations Section 1769(a)(1)(A), this section includes a description of the requested project modifications, as well as the necessity for the change.

2.1 Proposed Change

The proposed change to the project includes the addition of other COA water sources for construction water. The approved construction water supply is raw groundwater from Well No. 28, located at 3413 East Miraloma Avenue approximately 1-mile from the CCP site. The COA operates 23 active wells in the groundwater basin and SCPPA expects to use 11 AFY of groundwater from COA's Well 28 for construction uses not requiring potable water. During recent periodic testing of Well 28, COA detected concentrations of coliform. In the event that Well 28 becomes unavailable for use, SCPPA requests approval to access the same groundwater aquifer, confirmed by the Orange County Water District¹, via different wells accessing the same groundwater aquifer for the construction water supply.

Attachments 1a and 1b present a map of the COA Major Water Facilities and Data Sheet, respectively. Attachment 1a indicates that Well 28 is located in Pressure Zones 400/555, along with 4 other wells (Well Nos. 42, 43, 44, and 52). Attachment 1b shows that the wells in Pressure Zones 400/555 have well depths of between 364 to 1480 feet and are screened between 247 to 1450 feet. SCPPA is requesting to be allowed to use any of the wells in Pressure Zones 400/555 to provide up to 11 acre-feet of construction water consistent with the project's final decision.

The impacts associated with the proposed change is discussed in Section 3.

2.2 Necessity of Proposed Change

Sections 1769 (a)(1)(B) and 1769(a)(1)(C) of the CEC Siting Regulations require a discussion of the necessity for the proposed change to the project and whether this modification is based on information that was known by the petitioner during the certification proceeding.

The proposed change to the construction water source is due to the COA's desire to be able to continue to construction during periods when Well 28 groundwater production is interrupted. These changes were not known to SCPPA during the CPP licensing process.

¹ Telephonic Communication with Roy Herndon, Chief Hydrogeologist, Orange County Water District, 714-378-3260.

SECTION 3

Environmental Analysis of the Project Change

SCPPA has reviewed the modification proposed herein to determine if the proposed change will result in any environmental impacts that were not originally analyzed by the CEC when it approved the project in March 2010. The only discipline that could be affected by the proposed change described in this amendment is water resources. Additionally, the proposed change discussed in this amendment will not alter the operational impacts that were used as the basis to license the project during the original proceeding. Therefore, operational impacts are expected to be equal to those analyzed in the Final Decision and are not addressed in this amendment.

3.1 Water Resources

SCPPA is requesting approval to receive groundwater from select wells located in Pressure Zones 400/555 (see Attachments 1a and 1b). The wells in Pressure Zones 400/555 draw water from the same groundwater aquifer as Well 28 (see footnote 1). The Final Decision concluded that the use of raw groundwater for CPP construction water supply for dust suppression and non-potable water uses "That temporary use of groundwater will not significantly affect other users of groundwater in the project area."² SCPPA is not proposing to increase the **total** quantity, **nor does the amendment propose to increase the instantaneous draw** of groundwater used. Therefore, no impacts to groundwater resources are expected beyond those analyzed during the project licensing.

SCPPA proposes a revised Condition of Certification Soil & Water-3 in Section 4. The revised condition allows the use of groundwater from COA Well Nos. 42, 43, 44, and 52.

3.2 Cumulative Impact Assessment

The proposed change to the CPP license does not alter the basis of the cumulative impact assessments used in approving the CPP license.

² Canyon Power Plant Final Staff Assessment, September 2009, CEC-700-2009-008, page 4.9-11.

SECTION 4

Proposed Modifications to the Conditions of Certification

Consistent with the requirements of the CEC Siting Regulations Section 1769 (a)(1)(A), this section addresses the proposed modification to the project's Conditions of Certification.

Condition of Certification Soil & Water-3

A slight modification to the Condition of Certification Soil&Water-3 in the CEC Final Decision for the CPP will be required to allow the use of groundwater from wells within Pressure Zones 400/555 for construction water. The proposed revision to Condition of Certification Soil&Water-3 is presented below.

SOIL&WATER-3: The project owner shall provide the CPM two copies of a complete and approved groundwater meter application for the procurement and use of City of Anaheim (COA) Well Nos. 42, 43, 44, and 5228 raw groundwater for project construction, along with a Groundwater Use Plan. Potable water shall not be used for any CPP site or linear construction activity that is suitable for raw Well 28 groundwater use without CPM approval.

SECTION 5

Potential Effects on the Public and Property Owners

The proposed change described in this amendment will have no effect on the public and property owners beyond what was originally approved by the CEC.

The proposed project change is expected to result in comparable impacts to the public and property owners as were analyzed during project licensing. Therefore, impacts to the public and property owners are expected to be the same than those analyzed during the license proceeding for the project.

SECTION 6

List of Property Owners

Consistent with the CEC Siting Regulations Section 1769(a)(1)(H), this section lists the property owners affected by the proposed modifications. The list of property owners within 1,000 feet of the proposed project is provided as Attachment 2 to this Amendment.
