<b>NAME:</b>	Andrea Koch	<b>DATE:</b> 7/19/10
<b>WITH:</b>	Ahmed Haya, PE Engineer IV, Mountain House Community Services District (209-831-2300)	
<b>SUBJECT:</b>	Mountain House Community Construction in the Near Future	

**PHONE CONVERSATION:** I asked Mr. Haya about the types of construction in Mountain House that the Mountain House Community Services District (MHCSD) anticipates between now and 2012 (the first year of operation for the MEP). Mr. Haya knows that the developers have many projects they would like to construct over the next few years, but development is market-driven and the project schedule has not yet been solidified. He expects that the developers will at least build about 50-100 homes per year over the next few years, in accordance with recent development trends in the area.
