Subject: Lodi Energy Center (08-AFC-10)
Petition to Amend Air Quality Conditions of Certification and
SJVAPCD Draft Authority to Construct/Certificate of Conformity

Dear Mr. Hughes:

On April 4, 2013, we submitted to the CEC a revised Petition to Amend (PTA) air quality conditions of certification for Northern California Power Agency's Lodi Energy Center project. On May 9, 2013, the San Joaquin Valley Air Pollution Control District (SJVAPCD) issued a draft amended Authority to Construct (ATC) reflecting the amendments requested in our PTA, as well as additional changes developed by the District staff that update some of the permit conditions. We transmitted a copy of the District's draft ATC to the CEC on May 15.

As discussed by telephone earlier today, on behalf of NCPA Lodi Energy Center we request that when you revise the LEC Conditions of Certification to address the amendments requested in our PTA, you also include the amendments made by the SJVAPCD in its draft ATC in order to maintain consistency between the air permit and the Commission's Conditions.

If you have any questions regarding the PTA or the SJVAPCD revised ATC, please do not hesitate to call.

Sincerely,

Nancy Matthews
