**SUBJECT: ORANGE GROVE PROJECT (08-AFC-4C)
START OF CONSTRUCTION**

Dear Mike:

The Orange Grove Project has completed the conditions of certification that are required to be approved prior to the start of construction of the power plant and related facilities with three exceptions, including:

Documentation that Environmental Site Assessment fencing has been installed (BIO-9).

You have received approval of the grading plan. With proof of a fully executed lease and proof of a recorded Memorandum of Lease you will receive a grading permit. (Civil-1).

Construction may commence as soon as these items have been approved.

Two verifications to conditions of Certification (Soil & Water-8 and Soil & Water-11) that had been required prior to start of construction have been modified and the edited versions of these verifications will be sent separately. Please also note that we require a Report Of Waste Discharge (Form 200) and any related required permits be obtained from the Regional Water Board, California Department of Public Health, and submitted for approval by the Energy Commission prior to any discharge of waste water but not prior to start of construction.

If you have any questions, please call me at (916) 651-1227 or e-mail me at ryasny@energy.state.ca.us.

Sincerely,

Ron Yasny
Compliance Project Manager
