## DISCLAIMER

Staff members of the California Energy Commission prepared this report. As such, it does not necessarily represent the views of the Energy Commission, its employees, or the State of California. The Energy Commission, the State of California, its employees, contractors and subcontractors make no warrant, express or implied, and assume no legal liability for the information in this report; nor does any party represent that the uses of this information will not infringe upon privately owned rights. This report has not been approved or disapproved by the Energy Commission nor has the Commission passed upon the accuracy or adequacy of the information in this report.

# Verification Results: Compliance Period 1

## City of Riverside

---

### Background

Established in 2002, California’s Renewables Portfolio Standard (RPS) is one of the most ambitious renewable energy policies in the nation. Enacted by Senate Bill 1078 (Sher, Chapter 516, Statutes of 2002) with bipartisan support, and accelerated and expanded by subsequent legislation, California’s RPS establishes increasingly progressive renewable energy targets for the state’s electric service providers, requiring both retail sellers and local publicly owned electric utilities (POUs) to increase their procurement of eligible renewable energy resources to 33 percent of retail sales by 2020 and 50 percent of retail sales by 2030. Originally restricted to retail sellers, Senate Bill X1-2 (Simitian, Chapter 1, Statutes of 2011, First Extraordinary Session) expanded the statewide RPS to apply to POUs starting in 2011. The POUs have the following RPS compliance period targets through 2020:

RPS Targets for Local Publicly Owned Utilities <sup>1</sup>									
Compliance Period 1			Compliance Period 2			Compliance Period 3			
2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
20%	20%	20%	20%	20%	25%	27%	29%	31%	33%

### POU Procurement Verification Process

California’s RPS is administered by the California Energy Commission (Energy Commission) and the California Public Utilities Commission (CPUC). The Energy Commission is responsible for certifying RPS-eligible renewable energy resources, developing a tracking system to verify renewable energy procurement for all program participants, and overseeing compliance of the POUs. The CPUC is responsible for overseeing compliance and enforcement of the retail sellers.

As part of its administrative responsibility, the Energy Commission verifies the procurement claims of both retail sellers and POUs. The method used by the Energy Commission to verify procurement claims for RPS program participants is detailed in the *Renewables Portfolio Standard Eligibility Guidebook*<sup>2</sup> and further explained in the *Renewables Portfolio Standard Verification Methodology Report*, which can be found at

[http://www.energy.ca.gov/portfolio/documents/rps\\_verification.html](http://www.energy.ca.gov/portfolio/documents/rps_verification.html)

As POUs were mandated to comply with the statewide RPS program starting in 2011, this is the first issuance of verification results for POUs.

---

<sup>1</sup> Compliance with the RPS program is determined on a compliance period basis; however, each year within a compliance period contains a soft target that is applied to that year’s retail sales in order to determine that year’s contribution to the compliance period’s total RPS requirement.

<sup>2</sup> Refer to Section VI of the *Renewables Portfolio Standard Eligibility Guidebook, Eighth Edition*.

These verification results are not a compliance determination. The Energy Commission is responsible for determining POU compliance with the RPS.<sup>3</sup> After the Energy Commission adopts a POU's *Verification Results*, it will begin the process of determining if the POU is in compliance with the RPS requirements in accordance with the *Enforcement Procedures for the Renewables Portfolio Standard for Local Publicly Owned Electric Utilities*<sup>4</sup> for Compliance Period 1 (2011-2013). The Energy Commission's Executive Director will make a compliance determination informed by the verification results presented here and, if applicable, the application of optional compliance measures by the POU. The Executive Director will issue a letter to each POU documenting the RPS compliance determination. If the Executive Director determines a POU is not in compliance with the RPS requirements, a complaint will be issued to the POU, and adjudicated by the Energy Commission in accordance with the *Enforcement Procedures for the Renewables Portfolio Standard for Local Publicly Owned Electric Utilities*.

## Verification Results

This document provides the verification results for the City of Riverside's RPS procurement for Compliance Period 1 (2011-2013). The verification results are shown in renewable energy credits (RECs)<sup>5</sup> and include the following:

- The amount of eligible renewable energy procured by the City of Riverside.
- The Portfolio Content Category classification of eligible renewable energy.
- The City of Riverside's procurement target and portfolio balance requirements.
- Any optional compliance measures being applied by the City of Riverside.
- The City of Riverside's additional procurement above requirements, which may be applied to a future compliance period.

The Energy Commission finds that the procurement claim amounts listed in this report are eligible for the RPS, consistent with the RPS certification and procurement rules and requirements specified in the *Renewables Portfolio Standard Eligibility Guidebook* and *Enforcement Procedures for the Renewables Portfolio Standard for Local Publicly Owned Electric Utilities*, and should therefore count toward meeting the City of Riverside's RPS procurement requirements.

For Compliance Period 1, the City of Riverside procured eligible renewable energy equal to 21 percent of its retail sales for the period and met its procurement target. The City of Riverside also met its Category 1 portfolio balance requirement.

The table below summarizes REC eligibility determinations for City of Riverside, and provides a breakdown of the total procurement claim amount, the amounts identified as ineligible, the amounts withdrawn by the Load Serving Entity (LSE), and the procurement claim amount determined to be eligible for the RPS.

---

3 Pub. Util. Code § 399.30, subd. (o) and (p).

4 The *Enforcement Procedures for the Renewables Portfolio Standard for Local Publicly Owned Electric Utilities* are set forth in 20 CCR §§ 1240 and 3200 - 3208, and establish the rules and procedures by which the Energy Commission will assess a POU's procurement actions and determine whether those actions meet the RPS procurement requirements in the law.

5 Refer to 20 CCR § 3201(v). RECs are measured in megawatt hours (MWh).

City of Riverside withdrew 517 RECs that were claimed from the City of Riverside - UOC facility.

<b>Overview of RPS Claims (MWh):</b>	
Total RPS Claims Reported	<b>1,374,580</b>
<b>Ineligible Claims:</b>	
Amount ineligible because facility is not RPS-Certified when RECs were created	
Amount ineligible because the claim was retired more than 36 months after the vintage of the RECs	
Amount ineligible due to double claiming of RECs	
Amount ineligible because facility exceeded fossil fuel usage limit or used ineligible fuel	
Amount ineligible because generation not reported through WREGIS	
Claims with a pre-2011 vintage are only eligible for historic carryover	
<b>Withdrawn Claims</b>	
Amount withdrawn by LSE	517
<b>Claims Eligible Toward the RPS</b>	<b>1,374,063</b>
