**NOTICE OF RECEIPT****PETITION TO AMEND****THE ENERGY COMMISSION DECISION for the  
CROCKETT COGENERATION PROJECT (92-AFC-1C)**

On December 21, 2011, Crockett Cogeneration, a California Limited Partnership, filed a petition with the California Energy Commission requesting to modify the Crockett Cogeneration Project. The 240-megawatt project was certified by the Energy Commission on May 3, 1993, and began commercial operation in May of 1996. The facility is located in the unincorporated area of Crockett, in Contra Costa County.

**DESCRIPTION OF PROPOSED MODIFICATION**

The modification proposed in the petition would allow the installation of electric motor-driven natural gas compression equipment amidst existing generation equipment. The modification proposes no changes to existing conditions of certification (COCs) and proposes no new COCs.

**ENERGY COMMISSION AMENDMENT REVIEW PROCEDURES**

The purpose of the Energy Commission's review process is to assess the impacts of this proposal on environmental quality, public health and safety. The review process includes an evaluation of the consistency of the proposed changes with the Energy Commission's Decision and if the project, as modified, will remain in compliance with applicable laws, ordinances, regulations, and standards (Title 20, Calif. Code of Regulations, section 1769). Energy Commission staff is currently analyzing the request and will publish an analysis in the near future. A public hearing for the purpose of approving or denying the amendment proposal will be held at a regularly scheduled Energy Commission business meeting.

This Notice of Receipt is being mailed to interested parties and property owners adjacent to the project site who may want to participate in the amendment process.

The petition is available on the Energy Commission's website at: [http://www.energy.ca.gov/sitingcases\\_pre-1999/index.html](http://www.energy.ca.gov/sitingcases_pre-1999/index.html).
