Subject: Oakley Generating Station - Docket No. 09-AFC-4

All, as a follow-up to the December 7, 2010 status conference meeting on the Oakley Generating Station (OGS) project, I want to provide you with the following updated information. Although staff could not commit to a December 17 publication for a PSA, in light of the applicant's request to consider a bifurcated publication, staff believes that a **Part A** PSA can be published, assuming Committee Order for electronic filing, sometime between December 17 and December 21. Staff anticipates the Part A PSA document to contain the following sections:

- * Executive Summary
- * Introduction
- * Project Description
- * Cultural Resources
- * Hazardous Materials
- * Noise and Vibration
- * Public Health
- * Transmission Line Safety and Nuisance
- * Visual Resources
- * Worker Safety
- * Facility Design
- * Geology and Paleontology
- * Power Plant Efficiency
- * Power Plan Reliability
- * General Conditions

DOCKET	
09-AFC-4	
DATE	<u>12/09/10</u>
RECD.	<u>12/09/10</u>

The following sections **may be** a Part of the Part A PSA

- * Land Use
- * Socioeconomic Resources
- * Waste Management
- * Alternatives

The following sections **would not be** a Part of the Part A PSA

- * Air Quality
- * Biological Resources
- * Soil and Water Resources
- * Traffic and Transportation
- * Transmission System Engineering

Additionally, in response to the Committee's request to be informed of when outstanding draft sections are submitted to me, none of the five outstanding sections, which are listed as those that would not be included in a Part A PSA above, have been submitted as of the writing of this correspondence. This correspondence will be docketed.

Respectfully,

Pierre Martinez
