Subject: Re: Abengoa Mojave Solar Supplemental Staff Assessment – Part C (09-AFC-5)

Hamid

Thank you for your response.

I will have this email docketed for the Abengoa proceeding.

I can confirm that we used the Southern California Edison Lockhart Substation Project Description For Abengoa Solar Inc. Dated: April 15, 2010.

This was the basis for the Transmission System Engineering - Appendix A project description.

I copied the SCE Lockhart Substation project description and it was used by staff to prepare our document. The figures from the SCE document was also included in our TSE Appendix A .

Thank you for your participation in this project review.

Craig Hoffman

 Good Afternoon Craig,

As a follow up to our recent phone conversation, Southern California Edison (SCE) became aware of the Supplemental Staff Assessment - Part C on July 9, 2010 via an email from Abengoa Solar Inc. Due to the short timeframe, we have only performed a high-level review of the document. Also, it appears that the subject Staff Assessment may include the earlier version of the project description for the Lockhart Substation and its associated telecom routes. Can you please make certain that the April 15, 2010 version of the Lockhart Substation project description is incorporated into the final document. We would appreciate being added to your distribution list for future notices and documents published relating to the Abengoa Mojave Solar project.

We look forward to working closely with Abengoa and the CEC to support interconnection of this project into the CAISO grid. If you have any questions regarding this correspondence, please do not hesitate to contact me.

Regards,

Hamid Arshadi, CPM
