RE: **Blythe Solar Power Project, Docket No. 09-AFC-6**  
*Support letters for the Blythe Solar Power Project*  
Technical Areas: Project Description/Socioeconomics

Dear Mr. Solomon:

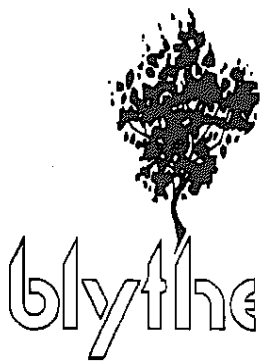

Attached please find the following community support letters for the Blythe Solar Power Project.

If you have any questions on this submittal, please feel free to contact me directly.

Sincerely,

Alice Harron  
Senior Director, Development

# CITY OF BLYTHE

Karen Douglas, Chair  
Robert B. Weisenmiller, Commissioner  
California Energy Commission  
1516 Ninth Street, MS-33  
Sacramento, CA 95814

Dear Commissioners,

I am a longtime resident and current Mayor of the City of Blythe. There are several areas that we are focused on to improve our city, but when residents come to me there is a common theme in their concerns, "We need jobs."

Simply put, the Blythe Solar Power Project will help provide much needed jobs to our community. Not only that, but the project will inject millions of new payroll dollars into local economies, as well as help local businesses through the purchase of supplies and services.

Solar Millennium has done an outstanding job of reaching out to the community and putting together a project that fits well with our city and will benefit our residents in a number of ways.

This company has also made an extraordinary effort to become a good neighbor and partner in our community. They have contributed to local programs and facilities that positively impact all residents and established themselves as a presence the Blythe community.

I am looking forward to construction of this project and have heard from countless residents and community stakeholders who see the importance of such an undertaking.

I fully support this effort and recommend that the California Energy Commission and Bureau of Land Management issue permits to get this important project underway in a timely fashion.

Sincerely,

Joey DeConinck  
Mayor, City of Blythe

cc: Bureau of Land Management

July 13, 2010

Ms. Karen Douglas, Chair  
Mr. Robert B. Weisenmiller, Commissioner  
California Energy Commission  
1516 Ninth Street, MS-33  
Sacramento, CA 95814

Dear Commissioners Douglas and Weisenmiller:

I am writing to express my support for the Solar Project near Blythe that is being proposed by Solar Millennium LLC.

Projects such as this will breathe economic life into an area that has been hit hard by the recession and housing debacles. Blythe, in particular, would benefit greatly.

These projects, during the construction phases alone, will create hundreds of jobs over several years and will be of paramount importance in jumpstarting the local economy. In addition to employing local laborer, workers from other areas will patronize Blythe's hotels, restaurants, and local businesses.

Although this project will not be entitled through the City, and the company therefore does not have to be a community partner, it has worked hard to be just that.

In addition to supporting local programs, such as the Blythe Recreation Center, Police Activities League Summer Swim Program and Community Outlook Conference, Solar Millennium also has held community meetings, sent out informational mailers and talked to residents on a consistent basis.

The company has gone above and beyond to make sure this will be the project possible for Blythe. In my opinion, they are the right path. As such, I respectfully urge you to support this important project.

Sincerely,

David A. Lane

City Manager

Energy Commission  
California

09 – AFC – 6

I think that the fact that Solar Millennium LLC., Voluntarily chose to switch from wet cooling to dry cooling in their proposed Blythe Solar Power Projects is just one example that proves this company believes in the good of renewable energy and not just squeezing every cent of profit they can.

By choosing this course, the company not only saved close to 90 percent of the water they would have used with wet cooling, but they also sacrificed 10 to 15 percent efficiency at the proposed plant, essentially losing money to protect the region's vital ground water resource.

They are also working with local colleges to develop curriculum so that students right here in Blythe can be trained to work at the Blythe project as soon as it is operations.

The Energy Commission needs to know how much Blythe wants and needs this project. Thanks for your time and I hope you will vote in supporting and permitting the Blythe Solar Project.

Best,

Mary Evans  
2400 E Donlon 2476A  
Blythe CA 92225

Dear Commissioners,

The jobless rate in Riverside County is one of the worst in the state and companies like Solar Millennium are proposing a project that would put hundreds to work over several years. The Blythe Solar Power Plant is exactly the kind of project we need to pull us out of this unemployment slump.

May's unemployment in Riverside County topped 14 percent according to the state's Employment Development Department. Projects such as the Blythe Solar Power Project outside of Blythe will not only help us create a new source of renewable energy, but an entirely new workforce.

Even after the hundreds of construction jobs are no longer needed, there will still be more than 220 workers needed for the Blythe Solar Power Project alone. Furthermore, more projects like this are being proposed that would create a whole new industry to put people back to work.

Companies such as Solar Millennium are already working with local college's that include College of the Desert and Palo Verde College to develop curriculum and train local residents to be ready to work in the plants once they're built.

We support this project and hope that the California Energy Commission joins us in our support so our county can reap the benefits of such an economically beneficial venture.

Regards,

California Energy Commissioners,

Thank you for taking the Blythe Solar Power Project under consideration. The truth is that Blythe needs this project more than this project needs Blythe.

According to the latest numbers, Blythe is at a staggering 16.7 percent unemployment rate and forecasts among analysts don't seem promising for recovery in the near future. It is undertakings like the Blythe Solar Power Project that will provide the necessary boost to Blythe's economy that it needs to get back on the right track.

Please support this important project for the future of the community of Blythe and for the future of America's sustainability.

Thanks,

Dear Commissioners,

I support Solar Millennium's proposed solar power project outside of Blythe for several reasons, but most importantly because of the jobs and commerce the projects will create and bring to our community.

I have gotten to know this company very well, and I have learned that they are a company who cares. They joined the chamber long before their project was close to approval — an approval that the City of Blythe doesn't even have to decide on.

They have addressed all concerns, changed their project to coincide with requests from stakeholders, and sponsored local programs and events.

This project is good for Blythe and will be great for our businesses. Please consider the positive impacts this will have for our community and support the Blythe Solar Power Project.

Blythe Solar Power Project (09-AFC-6)

Dear Commissioners,

I'd like to express my support for the Blythe Power Project proposed by Solar Millennium LLC. Solar Millennium has proved to be a good steward of the environment and a great community partner.

An example of this is their decision, early on in the process, to switch from wet cooling to dry cooling technology. This decision reduced their total water usage by approximately 90 percent, despite the fact that it would reduce the efficiency of the plant.

They have also altered their project to coincide with requests from organizations such as the Riverside County Airport Land Use Commission to make sure that this is the safest project it can be.

The benefits to this project seem endless, and the open lines of communication the company has had with residents and city leaders should be a standard for all companies like it to follow.

Thank You,

Blythe Solar Power Project

Dear Energy Commission,

This project is in the right place at the right time and should be allowed to go forward.

Over the past year, Solar Millennium has been an active member of our community, educating residents on the benefits of solar power, sponsoring local events and youth activities and always making themselves available to the residents of this fair city.

I know that they have gone above and beyond to make sure that this project meets all of the necessary guidelines and have done their due diligence to make sure they have mitigated any concerns with the environment and the airport.

Blythe resident deserve this project and we hope you support as much as our community has.

Thanks for your time,

To whom it may concern,

Wind and Sun are two of the greatest resources Southern California has to offer and with a new push towards renewable energy, Blythe is the perfect place to lead the charge.

With 350 days of sunlight, it's no wonder why a company like Solar Millennium chose a site just outside of our city limits for a solar power project.

The project will bring jobs and reduce our dependency on foreign oil. I'm all for it and I hope you are as well.

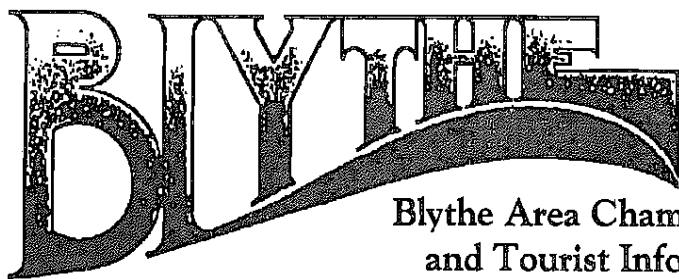

Kindest Regards,

Geraldine White
