However, in order to be addressed in the Energy Commission's Final Staff Assessment (to be released in mid-June, 2010) and evidentiary hearings (scheduled for July 12 and 13, 2010), written comments on the SA/DEIS should be provided to Mike Monasmith, Senior Project Manager, no later than 5:00 p.m., May 13, 2010 at the address on this letterhead (please add "Mail Slot 15") or by email to [mike.monasmith@energy.state.ca.us](mailto:mike.monasmith@energy.state.ca.us).

## **BACKGROUND**

On August 31, 2009, the Energy Commission began review of the project. The Energy Commission has the exclusive authority to certify the construction, modification, and operation of thermal electric power plants 50 MW or larger in California. The Energy Commission certification is in lieu of any permit required by state, regional, or local agencies and federal agencies to the extent permitted by federal law (Pub. Resources Code, Sec. 25500). The Energy Commission must review thermal power plant applications for certification (AFC) to assess potential measures to mitigate identified impacts, and to insure compliance with applicable governmental laws or standards (Pub. Resources Code, Sec. 25519 and Sec. 25523(d)). The Energy Commission is the lead agency under the California Environmental Quality Act (CEQA), but produces several environmental and decision documents rather than an Environmental Impact Report (EIR). If approved by the Energy Commission, the decision will establish the conditions under which the project shall be constructed, operated, and decommissioned.

Under the Federal Land Policy and Management Act (FLPMA), the BLM is responsible for processing applications for rights-of-way to authorize the proposed project and associated transmission lines and other facilities to be constructed and operated on land it manages. In processing applications, the BLM must comply with the requirements of the National Environmental Policy Act (NEPA), which requires that federal agencies consider the environmental impacts associated with the projects they approve.

The purpose of the BLM action is to provide the applicant a decision in processing its application for a right-of-way (ROW) grant for legal use and access of the public lands in Riverside County, California managed by the BLM. The need for BLM action is established by the BLM's responsibility under FLPMA, NEPA and other federal laws to respond to Genesis Solar, LLC's (applicant) request for a ROW for legal access to construct, operate and decommission a proposed concentrated solar thermal generation plant and related facilities on the public lands. BLM will decide whether or not to grant a ROW, and if so, under what terms and conditions.

The ROW application, if granted, would also create the need for amending the BLM California Desert Conservation Plan (1980 as amended) (CDCP). The purpose of the CDCP amendment is to ensure the public lands are managed according to the principles of multiple use identified in FLPMA while managing valid existing rights and other obligations established. The proposed amendment is necessary to address changing resource demands and technological development proposals on public lands. The CDCP as amended requires (page 95) that "Sites associated with power generation or transmission not identified in the Plan (as is this case) will be considered through the Plan Amendment process."

Pursuant to a Memorandum of Understanding (MOU), the BLM and the Energy Commission staff are conducting a joint environmental review of the Genesis Solar Energy Project in a NEPA/ CEQA process. It is in the interest of the BLM and the Energy

Commission to share in the preparation of a joint environmental analysis of the proposed project to avoid duplication of staff efforts, to share staff expertise and information, to promote intergovernmental coordination at the local, state, and federal levels, and to facilitate public review by providing a joint document and a more efficient environmental review process.
