## **Title 24 Certification for Ceiling Speakers**

I'm hoping you can help provide me with a little information and guidance for Title 24 certification. We are a speaker company and a few of our California dealers/installation companies are requesting that our speakers pass Title 24 certifications/inspections. I don't see much information regarding speakers, but I see it may fall under lighting and also in relation to AC/Heat retention in the home. Our speakers mount into the ceiling so I see that there may be a potential for a minor air leak, something we can seal up. However certification standard to know what to pass would be very helpful, as well as where we can have the test done.

Thanks for your help,

Mike Hopkins
