Energy Saving Products

Do you have someone there that researches or tests energy savings products in the consumer marketplace to make your customers aware? If so, we have a product we would like to submit. Our Flush Fit Register Booster <http://www.suncourt.com/product/HC500-W> installs in the register to boost airflow to under performing registers that are keeping a room too warm or too cold. With the Register Booster installed your customer does not have to adjust the thermostat just to make one room comfortable. Please contact me at 800-999-3267 or hsales@suncourt.com for more information.

Thank you,
Paul Smith
