PURPOSE

The purpose of the workshop is to allow staff, the applicant, intervenors, interested agencies, and the public to discuss water supply issues related to the HECA Amended Application for Certification, filed on May 2, 2012. The applicant proposes to utilize up to 7,500 acre-feet per year (afy) of brackish ground water, to be supplied through the Buena Vista Water Storage District (BVWSD), for use as cooling and process water at HECA. Energy Commission staff have identified water supply issues that require additional discussion and clarification prior to completing their water supply analysis. The issues resolution workshop is intended to clarify and discuss possible alternatives and mitigation strategies for the proposed water supply plan.

BACKGROUND

On May 2, 2012, the new HECA owner, SCS Energy, LLC, submitted an Amended Application for Certification (08-AFC-8A) reflecting several changes to the original project design. The new project features did not change the water supply source from what was originally proposed under the 08-AFC-08 application.

PROJECT DESCRIPTION

The applicant proposes to construct and operate an integrated gasification combined cycle (IGCC) power generating facility called Hydrogen Energy California (HECA). The proposed HECA power generating facility would gasify blends of 75 percent western coal and 25 percent petroleum coke from California refineries to produce hydrogen to fuel a combustion turbine operating in combined cycle mode. The amended project incorporates a proposed manufacturing complex that would produce urea in both liquid and pellet form, and other byproducts for agricultural uses. The combined cycle power block would generate approximately 405 MW of gross power and would provide a nominal 300-megawatts of electricity to the grid.

The gasification block would also capture approximately 90 percent of the carbon dioxide (CO₂) from the raw syngas (the direct end of the gasification process) at steady-state operation. The captured CO₂ would be transported via pipeline to a custody transfer point at Occidental Petroleum's Elk Hills Oil Field for use in a planned enhanced oil recovery (EOR) process that would result in CO₂ sequestration. All documents associated with evaluation of the HECA may be found on the project web page using the link provided below. Staff will use information obtained from the workshop discussions in the preparation of its preliminary staff assessment of the project.

PARTICIPATION

Please direct your technical or project schedule questions to Robert Worl, Energy Commission Project Manager, at (916) 651-8853, or by e-mail at robert.worl@energy.ca.gov. If you desire information on participating in the Energy Commission's review of the project, please contact the Energy Commission Public Adviser's Office, at (916) 654-4489 or toll free in California, at (800) 822-6228. The Public Adviser's Office can also be contacted via email at publicadviser@energy.ca.gov.

If you have a disability and require assistance to participate, please contact Lou Quiroz at (916) 654-5146 at least five days in advance.

If you wish to provide written comments on the project, please submit comments to the Energy Commission Dockets Unit. Please include the docket number 08-AFC-08A for the HECA project in the subject line or first paragraph of your comments. If you wish to submit comments electronically, please provide them in either Microsoft Word format or as a Portable Document Format (PDF) to docket@energy.ca.gov. Please include your name or organization's name in the file name. If you are preparing non-electronic written comments, please mail or hand deliver them to:

California Energy Commission
Dockets Unit, MS-4
