Hello All:

Attached is a map prepared by our Cartography group that helps to show the location of the 3 proposed solar projects in proximity to each other, and begins to show existing pronghorn and tule elk activity in the Carrizo Plains.

This is intended to support our staff's analysis of direct and cumulative impacts of the Carrizo project, and may be helpful to others. Please let me know if you have any questions or comments about this map.

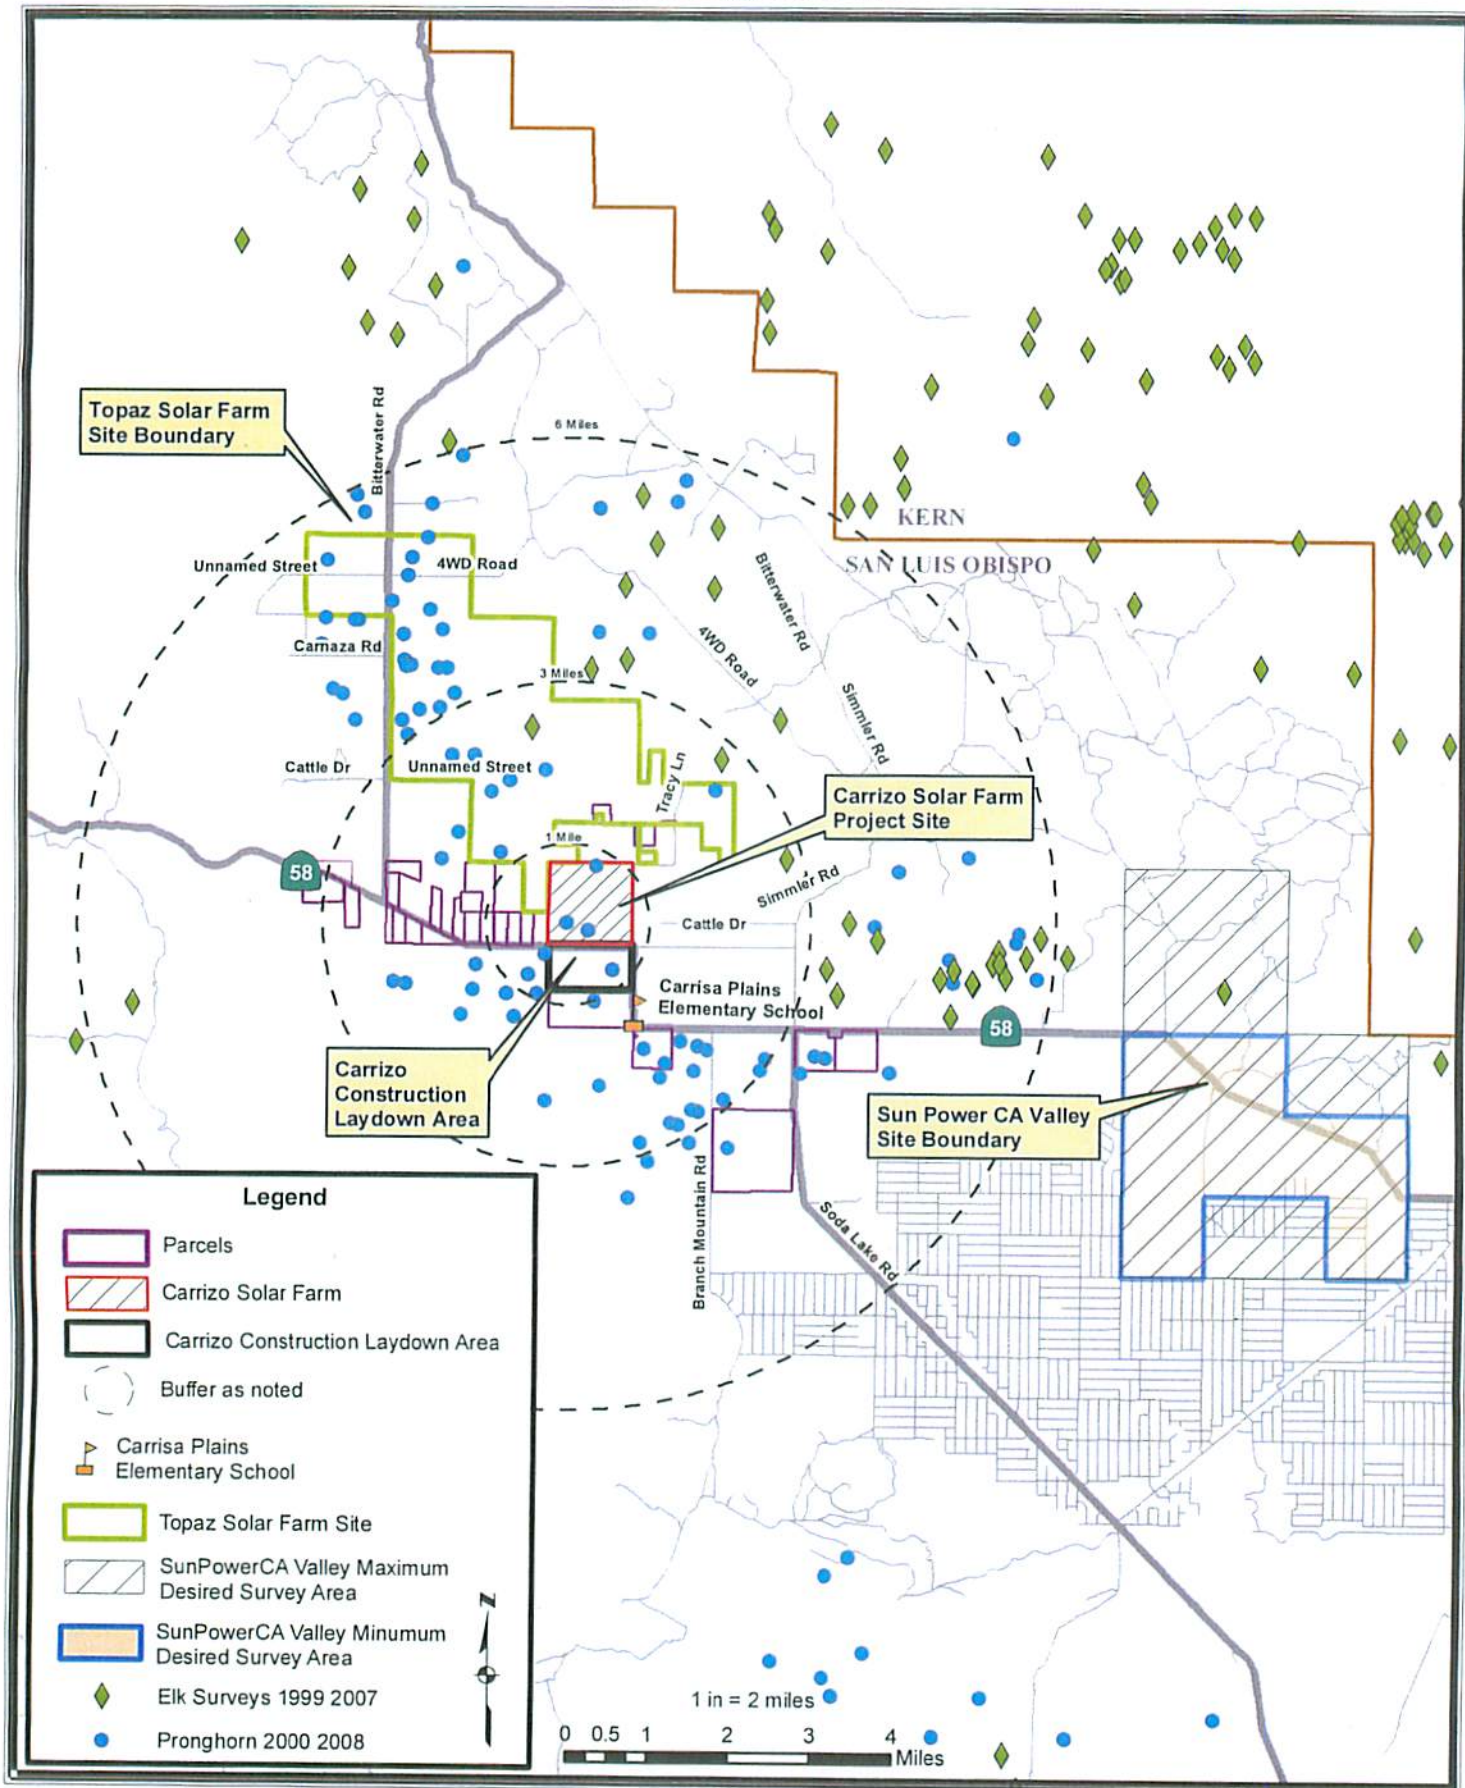

Thank you,

John

Thank you John,  
This map proves a lot of points. It leaves nothing to the imagination as to where to Antelope Corridor is.

Here is a revised map. The added dots for the antelope can be proven with pictures.
