Project Description: The Malburg Generating Station Project would be a nominal 134 MW, natural gas-fired combined cycle power plant. The project is located at the City of Vernon's existing Station A complex.

On May 20, 2003, the California Energy Commission approved the above-described project pursuant to a regulatory program certified by the California Secretary of Resources under Section 21080.5 of the California Public Resources Code.

1. The project will not have a significant effect on the environment.
2. Mitigation measures were made a condition of approval of the project.
3. A statement of Overriding Considerations was not adopted for the project.

The Commission docket files containing the final Commission Decision and other information regarding the project are available to the public at: California Energy Commission, 1516 9th Street, Sacramento, California, 95814. The final Decision and other information regarding the project are also available on the Commission's web site--[www.energy.ca.gov](http://www.energy.ca.gov).
