## **Jumpstarting building electrification**

California must move away from methane and transition toward zero-emission homes and businesses. This will improve air quality and safety in our communities.

I have started doing my part by buying solar panels for my home. But, this can't be addressed on a person-by-person basis. We urgently need mass acquisition of alternative, green energy sources everywhere.

I urge the Commission to prioritize building decarbonization and identify more strategies that will jumpstart electrification.

It's clear that electrifying over 13 million homes and buildings across the state will take all hands on deck. The IEPR should help prompt a successful transition toward zero-emission buildings.

Thank you.
